

case study: a closer look at **PRIVATE RESIDENCE**

Romero Modular Thin Brick and Modular Facebrick

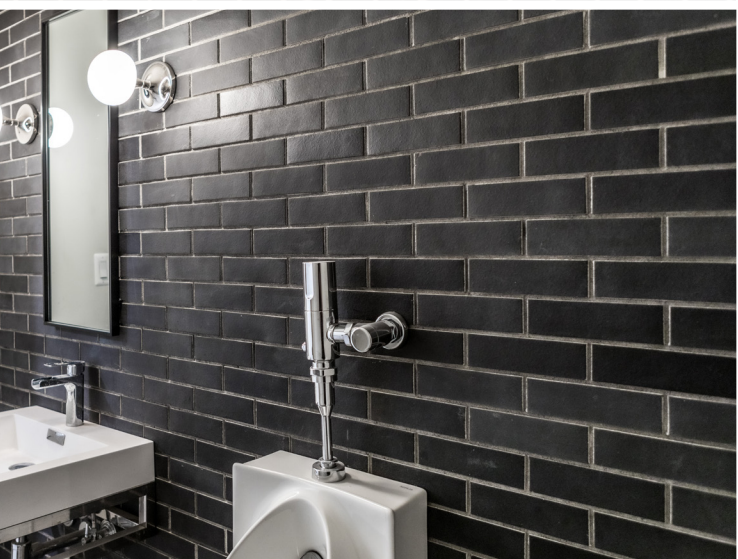

Private Residence • McLean, Virginia

The 8,838 square foot, custom, modern home in McLean has a unique mixture of Piet Mondrian art and Frank Lloyd Wright architecture. The location is well known to many diplomats, military, members of Congress, and other high-ranking government officials due to its proximity to Washington, D.C.

This home was set out to be the essence of modern luxury with custom features and finishes, and truly unparalleled design. The exterior façade of this home uses a mix of high-end building materials including the through-body black brick, “Romero” imported from Spain as part of Glen-Gery’s La Paloma Series, carbonized wood siding and asymmetrical

siding panels. Not only does this home feature brick on the exterior, but also incorporate the breathtaking black “Romero” Thin Brick throughout the interior of the home from the 10-foot wide floor-to-ceiling fireplace to the bathroom walls and floorings.

“We set out to build a home like no other that integrates sustainability and beauty. This special home has stories behind many of the hand-selected and sourced features. I look forward to sharing it with a buyer that appreciates the attention to detail and unique qualities.” -Ahmad Khreshi, Founder and President, Home Perfection Contracting.
